

*While fashions may come
& go, a classic is
Forever.*

CLASSIC GATTISTONE PAVERS TO STAND THE TEST OF TIME.

*Our experience
will bring your
vision to life.*

Every landscaping project begins with a vision, a clear idea of the mood and style which the finished space will convey. An important part of that vision is your choice of pavers. They are often the most enduring aspect of your landscape design. Since 1948, SVC has been an innovative supplier of high quality precast concrete pavers for a huge range of commercial and domestic projects. It's that wealth of experience, together with an uncompromising commitment to quality and service, which is built into the current range of standard pavers and custom made alternatives, that will bring your landscaping vision to life.

Colours & Textures

From subtle tones through to rich, earthy colours. From smooth finishes to inviting stone textures. Our standard pavers reflect the changing moods of the environment. Mix these variations with your own design from our 'Custom Pave' facility and you have an almost limitless array of paving options.

*Do you have something
particular in mind?*

When it comes to landscape design, we understand that you often have a very specific idea about the paving you prefer to use for your project.

To satisfy your preference, we offer our 'Custom Pave' option. Our skilled craftsman will create a range of pavers to meet your design brief. You can specify shapes, sizes, colours and textures which will enhance your project. Sandblasted decorative detailing and patterns will add a personalised finishing touch.

*Colours & textures from the earth blended
with the strength of concrete to last into
the next millennium.*

Give life to the Idea and we will make it Reality.

Classic or Dramatic. The choice is yours

The flexibility of our 'Custom Pave' facility gives you a design scope which is second to none. Let your imagination run free and we will rise to the challenge. Here is just a small sample of what can be achieved when a degree of flair is matched with a few decades of experience and innovation.
